Code Cube

Electronic Memory Keyer

Overview

The **Code Cube (CC)** is a plug-in module designed to convert either the **Mini Paddle** or **Palm Single** into the world's smallest, fully featured electronic memory keyer. A call sign memory, freely programmable memories and an independent CQ mode with different features are available. Naturally it can be switched to **Iambic mode A or B**.
A **Dot or dash memory** is selectable, **Ultimatic mode** or **reverse paddle function** are available also. A **TUNE** button is very useful for antenna alignments. Headphones are ideal e.g. for training purposes. For standalone use, e.g. with other brand paddles, a **Housing kit (CC-HK)** is optionally available.
